TRANSFORMING DATA INTO USEFUL INFORMATION

We are the experts for Business Intelligence (BI),
especially for products, consulting and training relating BIRT.

01 About TRADUI

"Transforming Data Into Useful Information" is not just a slogan for us, but a claim that plays an increasingly important role in the era of digitalization."
Thorsten Junike, CEO of TRADUI Technologies GmbH

We are a specialized and successful provider of business intelligence solutions, where both customers and employees feel well taken care of. Since our establishment in 2004, we have been offering excellent reporting solutions to our customers at a balanced price-performance ratio. We support you in the advancement of your company by helping you efficiently collect, structure, and analyze data.

02 Why TRADUI ?

- Specialized provider of business intelligence solutions
- Germany's leading experts in the open-source BI solution BIRT
- Experienced and highly specialized team
- Innovative solutions for our customers' individual challenges
- Fair and trustworthy relationships with customers and employees
- Short implementation times
- Industry expertise and process knowledge
- Cost-efficient products and services
- Experience with projects of various scales

With us, you will have a flexible, fair, and reliable solution partner. We make promises that we can keep.

03 Products & Services

Whether you are a start-up, government agency, or DAX-listed company, our portfolio offers you a variety of options to drive your business forward.

Software
Our BIRD Suite and plugins provide you with a powerful enterprise platform for reporting, analysis, and planning. Customers benefit from continuous enhancements, tailored features, automation capabilities, and our individualized support. As a result, our product portfolio is the ideal business intelligence solution for any type of company.

Consulting
Our consulting services focus on business intelligence and corporate performance management with particular expertise in reporting and analysis, across industries.

Our range of services includes not only the creation of content-rich and visually appealing reports but also data consolidation and provisioning. We rely on years of technical and domain expertise proven through numerous customer projects.

Training & Support
We answer your questions and support you in seamlessly integrating BIRT into your environment with a variety of support services - via email, phone, or through our support portal.

Furthermore, we offer training programs where our experts impart practical knowledge to enable you to efficiently create reports and analyses for your business.

Products

With our BIRD Suite and plugins, which are built on the open-source BIRT platform, we take your business intelligence to a highly capable enterprise level. BIRT offers numerous strengths, including continuous development by the Eclipse community, Java portability, and extensive customization options.

servBIRD

Powerful BIRT Report Server

The comprehensive BI server system for your reporting needs based on the open-source BIRT platform. servBIRD not only handles basic tasks such as administration, authentication, and report generation but also automates, centralizes, and simplifies the entire flow of information in your company.

BIRD Applications
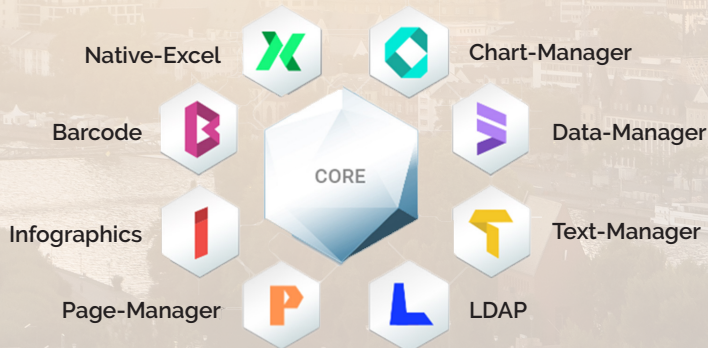

Fast and efficient application development

Develop interactive components and applications quickly and easily on the same platform as your reports. Drastically reduce development efforts for small specialized applications through modular design and existing infrastructure.

dashBIRD

Interactive and dynamic dashboards

dashBIRD is a module of servBIRD for generating personalized dashboards. Easily and quickly create interactive dashlet components to visualize information in the most effective and compact way, even on tablets and smartphones!

dashBIRD Studio

Design your own dashboards!

The Self-Service package, dashBIRD Studio, allows business users to easily generate dashboards for spontaneous analysis of business processes and workflows. With user management capabilities, these dashboards can be shared as needed.
